

MASTER BUILDERS GREEN LIVING CONFERENCE 22 AUGUST 2014

Keep up to date with the latest developments and impress your clients by building better quality houses and providing improved outcomes for your clients.

Keep up to date with the latest developments in breathable membranes, prefabricated flooring, cost effective renovations for improved energy efficiency and advances in solar power and battery storage systems.

This year the conference focus turns to the latest developments that are designed to provide improved outcomes for your clients. Hear from a range of speakers and take part in product demonstrations that will provide you with the latest information you also get the chance to ask all the questions you want.

The range of topics include;

Deliver better quality buildings efficiently

**Thomas van Raamsdonk - General Manager
Pro Clima Australia Pty Ltd
Leaky Buildings in Australia –
Systematic failure in construction**

How does moisture move through a building?

What are issues and practical solutions?

Can software programmes such as WUFI and Blower Door testing help us to prevent building damage?

**Nick Cui - Engineering Associate
Pryda Australia**

Engineered Timber floor Cassette Systems

New design methods, coupled with excellent performance and lightweight construction means engineered timber provides a range of solutions and improved building efficiency.

In this session you will see how panelised floor cassettes can be used for sub-floor construction as an alternative to concrete slabs as well as first floor applications where speed and efficiency results in significantly quicker construction times.

This conference is proudly sponsored by:

**Valuing energy efficient renovations -
“how much will it cost me and how much money will I save?”**

**Sarah Fiess - Project Lead Renovations
Sustainability Victoria
Building Smarter Renovations**

Victorians spend more than \$2 billion annually renovating their homes. When a client chooses to renovate, they have a valuable opportunity to make their home more energy efficient, save energy costs and improve their liveability. This session will help you provide answers to those often asked questions, “how much will it cost me and how much money will I save”?

Advances in energy solutions

**Dr Stephen Bygrave - CEO
Beyond Zero Emissions
Zero Carbon Australia Buildings Plan**

Stephen will talk about the Zero Carbon Australia Buildings Plan and Energy Freedom, a new initiative by the think tank Beyond Zero Emissions to implement zero emission buildings in Australia. It can be done and is easier than you think.

**Tosh Szatow, Director and co-founder
Energy for the People
Beyond the Stars – New battery technologies and off grid solutions**

The rapidly changing cost of energy technologies has created the potential to align financial, social and environmental objectives in housing projects. He will explain how the traditional approach to sustainable housing is becoming less relevant, and how developers and builders can capitalise on emerging trends by incorporating new battery technologies and off grid solutions.

**Justin McFarlane, Business Development Director
Australian Geothermal Solutions
Using the Earth to heat and cool your home and buildings.**

How does Geothermal heating and cooling work and is it possible to heat and cool houses and buildings?

REGISTRATION

Members **MUST** quote MBAV Membership Number or risk being charged non-member fees

Secure your place now!

Date: 22 August

Time: 8.30am - 4.00pm

Location: BLSC Building Leadership Simulation Centre
49 Brady Street
SOUTH MELBOURNE VIC 3205

Catering: Morning tea, lunch and afternoon BBQ provided

Registration Options

Online: www.mbav.com.au

Phone: (03) 9411 4555 Fax: (03) 9415 7084

Mail: GPO Box 544, Melbourne VIC 3001

Cost:

Master Builder Members \$ 70.00

Non-members \$ 100.00

Students (must enrol via fax or post) \$ 70.00

Student Number & Educational Institution

Accredited Green Living builders will receive a free promotional pack
